Mrs. Stansliffe's successful Bed & Breakfast's female guests return year after year. Her neighbor, the elderly "Bud the Stud" Davis, believes they come to visit him for romantic liaisons. Her other neighbor, Henry Mitchell, is a retired chemist who has developed a blue pill called "Venusia," which increases the libido of menopausal women. Bud uses some of the Venusia pills in an attempt to entertain three older female guests! The women mix up Bud's Viagra pills with the Venusta, which has a strange effect on men: it gives them all the symptoms of menopausal women, complete with hot flashes and mood swings! As the mayhem settles down, all the women's lives move in new and surprising directions.
